The Elos Accurate Library offers a complete digital open workflow solution for Desktop or Intra Oral scanning.

The Elos Accurate libraries are divided into groups to make it easy to download the relevant library or all.

Elos Accurate® Hybrid Base™ Bridge: Contains prefabricated components with a titanium interface towards the implant with engaging interface. It is used for screw-retained bar or bridge constructions.

Elos Accurate® Hybrid Base™ Kit: Contains prefabricated components with a titanium interface towards the implant with engaging interface. It is used for screwed single or small cemented bridge restorations.

Single Abutment: Is used for milled single abutments using the Elos Pre-milled Abutments.

Bar & Bridge: Is used for creating a bar or bridge in one piece and includes the interface geometries.

Before installing new libraries

We recommend to always remove old libraries before installation of the new Elos Accurate® Library. If this is the first time an Elos Accurate® Library is installed, you can proceed to the next chapter of this instruction.
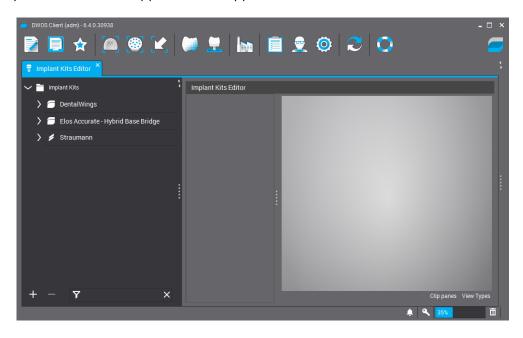

- Start the DWOS Client.

This opens the DWOS Client software. Click on the **Settings** icon and select **Implant Kits**
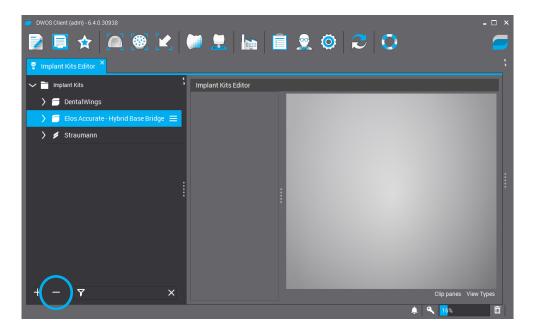

Elos Accurate® Library

Now the Implant Kit Editor tab appears in the upper left corner of the DWOS Client.

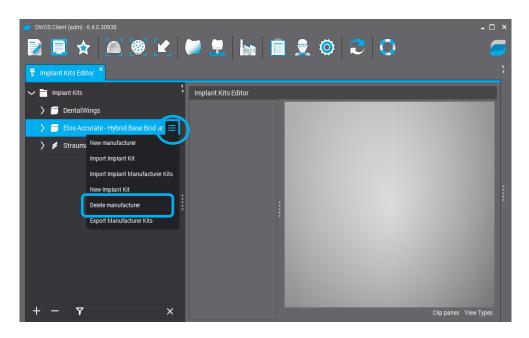

There are two ways to remove libraries from DWOS.

First option: Click on the library name that you want to delete to mark it. Click on the "**minus**" sign in the bottom to delete the library.
